

PROPOSED TRAFFIC RESOLUTION

Reference: TR 82 – 17

Location: Cuba Street, between Ghuznee and Vivian streets

Proposal: Contraflow cycle lane

Information: Wellington City Council is working to make cycling safer and more convenient for people travelling on bikes. The current Cycleways Programme has allocated \$1.5 million for minor improvements in the central area. The changes proposed by this report are some of the first investments of this programme. Other proposals for the central area are currently being developed and are expected to come before the City Strategy Committee later in 2017.

Connectivity is one of the three key improvement themes identified during the working group meetings for the Wellington central area minor cycle improvements project. Provision of safe and convenient connections improves cycle accessibility and permeability in the city. It is also an essential element for promoting cycling as a viable transport mode and encouraging people to get on a bike.

The proposed changes outlined in this report aim to improve accessibility and permeability by providing a more convenient cycle connection through Cuba Street between Ghuznee and Vivian streets.

This section of Cuba Street currently has a one-way restriction which allows the general traffic to travel only northbound from Vivian Street towards Ghuznee Street. It has a low traffic volume of approximately 2,400 vehicles per day and a low operating speed of around 28 km/h.

The section of Cuba Street between Manners and Ghuznee streets is a pedestrian mall. Cycle use is prohibited through this section but people can push their bikes while walking. Cuba Street south of Vivian Street allows two-way traffic movements. Cuba Street is not a main route but it provides a good north-south link between Mount Cook and the City Centre. The current level of service for cyclists is poor as the southbound cycle movement is prohibited due to the one-way restriction on Cuba Street.

Given the relatively low traffic volume and speed on this section of Cuba Street, we propose installing a contraflow cycle lane to improve cycle connectivity by allowing people on bikes to travel southbound from Ghuznee Street towards Vivian Street.

This report recommends providing a contraflow cycle lane on Cuba Street to allow people on bikes to travel southbound between Ghuznee and Vivian streets.

PROPOSED TRAFFIC RESOLUTION
